

Your street lights are being changed over to more energy efficient, brighter and better lights. The new lights will last longer and save electricity costs.

## So what happens to the old street lights?

Components that go to landfill		1.5%
9	80W Mercury Vapour lamp (bulb)	1.5%
8	Copper wires	0.5%
7	Photo Electric cell	1%
6	Ceramic bulb holder	2%
5	Clear lense	16.5%
4	Black plastic cover	13%
3	Miscellaneous metals / screws	0.5%
2	Ballast	30%
1	Aluminium body	33.5%

Plastic plugs and miscellaneous items

Note: Percentages are calculated by weight
