

GREATER SHEPPARTON

One Tree Per Child

April – October 2017

GREATER SHEPPARTON

Community Group Expression of Interest Form

In 2016, Council commenced its involvement in the “One Tree Per Child” project with the aim of planting a plant for each person aged under 18 in our municipality. Planting a tree is often a child’s first act of volunteering for their community and can lead to better health outcomes. It empowers children into realising that they can make a personal difference for our community and our local environment.

Greater Shepparton City Council invites you to take part in one of our planting events in 2017. More information will be available via the media and on Council website early 2017. Council has purchased plants and guarding materials for the community to utilise. Interested groups can plant at a pre-prepared site on Council land.
