

Let's plant One tree per child in Greater Shepparton

Greater Shepparton City Council invites our community to partner with us to make Greater Shepparton a greener, happier place via the global **One Tree Per Child Project.**

Planting a tree is often a child's first act of volunteering for the benefit of our entire community. Let's leave the municipality in better condition than what we inherited. Let's plant a tree for every child and **enjoy watching the trees grow as our children grow!**

Continue our recent planting efforts by planting indigenous trees to improve our environment, provide animal habitat and beautify your neighbourhood.

| | | |
