Shepparton Bypass Stage 1
Planning for Stage 1 of the Shepparton Bypass is underway, funded by a $10.2 million Victorian Government investment over two years. Stage 1 plans include connecting the Midland Highway at Mooroopna with Wanganui Road in Shepparton North, creating a second river crossing between Shepparton and Mooroopna and upgrading Wanganui Road.

Safety improvements between Stanhope and Mooroopna will include:
• Installing traffic signals at KidsTown
• Installing safety barriers in high risk locations
• Constructing a new roundabout at the intersection of Tatura-Undera Road and Midland Highway.

Midland Highway

Planning for the installation of traffic signals at the intersection of Goulburn Valley Highway and Graham Street.

Shepparton Alternative Route
Conducting a planning study to investigate capacity and safety improvements for our freight networks along this route. Works to be carried out include upgrades to roundabouts on Old Dookie Road and New Dookie Road and asphalt resurfacing in several locations.

Goulburn Valley Highway
• Planning for the installation of traffic signals at the intersection of Goulburn Valley Highway and Graham Street.
• Asphalt resurfacing on: Riverview Drive, Longstaff Street and the intersection of King Street and Nixon Street.

Wanganui and Ford Roads
A feasibility study investigating potential upgrades for this arterial link will be undertaken by VicRoads and the Greater Shepparton City Council.
